

Dorso's attractive, contemporary look is carried over to an extensive range of guest seating: 4-legged, cantilevered, and on casters. Guest seating can also be ganged, to allow for multi-functional applications. And Dorso also includes the broad N Line offering, designed for more task-intensive environments. Please consult Dorso N Line and Dorso Guest Seating brochures for additional information.

TOP LEFT: Leather wrapped fixed arm available with Silver Metallic finish; TOP RIGHT: The synchro tilt mechanism, which provides a single lever controlling a range of tilt lock locations, an anti-kickback release, and gas lift height adjustment. BOTTOM LEFT: Polished Chrome metal elements; BOTTOM RIGHT: Optional textured plastic adjustable arm.

Dorso reflects Krug's commitment to achieve the highest standard of sitting comfort and correct body posture. Dorso's seat and back have been designed to provide comprehensive support to the body's

lumbar and thoracic region. Formed steel frames and dual-density injection molded foam have been brought together to provide the ergonomics required in today's work environment.

Dorso's distinctive thin profile is a unique achievement in upholstered seating. A proprietary process incorporates dual-density injection molded foam in its interior steel frame. The result is a chair that provides comprehensive support for the body's lumbar and thoracic regions. It conforms to the specific shape of every individual's back, seat and legs much more actively than plastic, mesh and other less sophisticated foam systems.

Presenting one of the world's most advanced seating concepts: new technology that allows for exceptional sitting comfort and support in a strikingly modern chair design. The bold vision of Spanish designer Gabriel Teixidó represents a new direction in workplace seating – yet provides a level of long-term sitting comfort that has been the hallmark of European chair design.

In addition to surpassing North American ANSI/BIFMA standards, Dorso has been certified to European DIM seating standards, which are rigorously focused on ergonomics. Beyond Dorso's exceptional performance characteristics, there is also the focus on upholstery: each chair a unique, hand-crafted creation, allowing for the use and combination of a wide range of fabrics and leathers.

The metal elements of the S Line are distinctive, and even functional – with the bar at the top of the back serving as a handhold for easy movement. Two finish options are available on these components: Silver Metallic and Polished Chrome. An optional headrest provides enhanced neck muscle support.

TOP LEFT: Textured plastic fixed arm; TOP RIGHT: The Synchro tilt mechanism, which provides a single lever controlling a range of tilt lock locations, an anti-kickback release, and gas lift height adjustment; BOTTOM LEFT: Seat profile with I-Mark™ Synchro tilt mechanism visible; BOTTOM RIGHT: Optional textured plastic adjustable arm.
